# Product Monitoring
# Laser Sensor Eagle Eye

Characteristics

- Universal monitoring sensors (product monitoring, trigger, etc.)
- Compact design
- Easy to integrate into existing systems

Fields of Application

- Special machines
- Printing presses
- Print processing
- Folding box
- End packaging
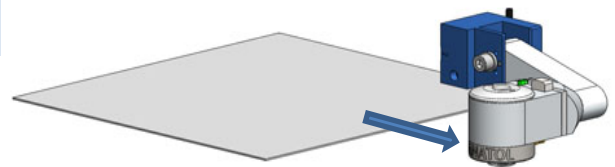

PLANATOL SYSTEM

Description

The sensor can be used for monitoring the presence of different products (paper, wood, plastic etc.) or for application monitoring of glue lines or dots on individual products. When setting the applicator head the laser point will facilitate its orientation. On option, the sensor is precisely adjustable in one axis and thus can monitor edges.

Equipment Features

- Shorter set-up times by easy positioning with laser point.

- Applicator heads will be switched off automatically when the product is missing.

- Optional with flexible edge monitoring

- In case of endless products reduction of machine soiling

- Quality assurance by early fault detection

Technical Data

Product distance	5 – 30 mm
Protection class	IP 67
Laser class	1
